

Leaders in Trusted Technology and Innovation Come Together

Built and designed to work together, the future of electrophysiology is driven by the collaboration of Osypka and Stereotaxis. The collaboration combines more than 40 years of Osypka's leadership in innovation and manufacturing with Stereotaxis' advanced robotic technology.

OSYPKA

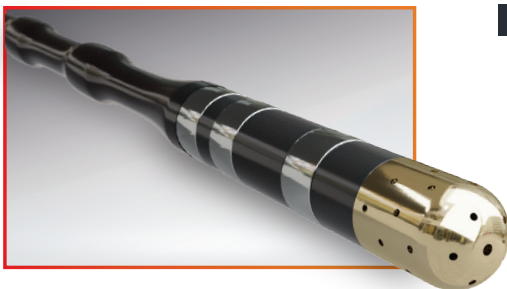

STEREOTAXIS

HAT 500® System: Ablation Generator, Pump & Remote

- Newest technology from inventors of the first RF ablation generator
- Compatible with Stereotaxis RMN systems
- High resolution touch screen with remote control
- Uni- or bipolar ablation with one device or two catheters
- Flow control depending on energy output

Next-Generation Robotic Magnetic Catheter

- Designed with and manufactured by Osypka
- Gold ablation tip designed for optimal RF transduction
- Low-flow irrigation pattern and flow distribution
- Optimized magnet placement designed for enhanced navigation and stability
- Coming to Europe with CE mark expected in 2021

Stereotaxis Genesis RMN® System

- Computer controlled robotic magnets for catheter navigation
- Unparalleled catheter precision, reach & stability
- Improved physician experience & safety*
- Improved patient safety and outcomes*
