

TELEROBOTICS

DISCOVER HOW TELEMEDICINE AND ROBOTICS CAN TRANSFORM THE OPERATING ROOM

Improve patient care

Expand access to high-quality therapy

Enhance physician education, safety, and efficiency

TeleRobotic
Support

Remote Clinical and Technical Procedure Support

- Receive support without increasing viral transmission risk
- Allow continued education on new technologies and techniques

TeleRobotic
Collaboration

Live Peer-to-Peer Training and Proctoring

- Build collaborative network of physicians supporting each other in complex cases
- Improve training and oversight of fellows/peers from outside the lab
- Allow peer-to-peer procedure observations without travel (TeleRobotic site visits)

TeleRobotic
Surgery

The Future of Remote Surgery with TeleRobotics

- Increase access to high-quality care in under-served communities
- Leverage highly skilled physicians beyond geographic limitations
