

ROBOTIC EP INTRODUCTION PROGRAM

Empowering the Future of Healthcare with Robotics

ROBOTIC EP INTRODUCTION PROGRAM

Empowering the Future of Healthcare with Robotics

Expand your clinical expertise, enhance your career opportunities and interact with the global EP community.

The Robotic EP Introduction Program:

- Begin mastering your robotic skills
- Train using TeleRobotics, no travel needed
- Complete program in 5 hours
- Join tailored individual and group events that accommodate your schedule
- Receive certificate of completion

1

Improve Technological Skills

Differentiate and enhance your technology toolkit for expanding patient referrals and clinical treatment options. Enhance your resume and competitive attraction to hospitals. The course curriculum includes:

- Overview of Robotic EP technology and fundamentals
- Navigation simulator training
- Peer to peer connection

2

Gain Access and Train With Robotic EP Pros

Benefit from Stereotaxis' global network of robotic EP programs, guidance and support. Through the TeleRobotic capabilities of robotic magnetic navigation, easily and remotely connect with peers and leaders in robotics from around the world.

- Join the Society For Cardiac Robotic Navigation (SCRN)
- Connect easily with peers and leaders in robotics through TeleRobotic capabilities

3

Help Shape The Future Of Robotic EP

With over 100,000 patients treated with Stereotaxis technology, and at a time when various surgical specialties are being transformed by robotics, it is impossible to imagine a future without robotics. Ensure you are ready by helping shape the future of robotic EP.
